Enterprise PODROMANIJA LTD is situated in Sokoc, few kilometers away from Sarajevo, in Bosnia and Herzegovina.

PODROMANIJA LTD is an enterprise that has long tradition in production and installation of exterior and interior doors and wooden windows. It was established in the course of 1990s. The enterprise has been modernized by acquisition of new machines and introduction of technological innovations into the production process with the aim toward improving product quality and meeting client requirements. Careful selection of materials guarantee quality products both in standard and special form; our finishing works are meticulously carried out and long lasting. Thanks to first-rate machines, the company can produce windows and interior doors from any type of wood, in standard and customized dimensions. Our attentiveness to the needs of our clients ensure customized, sophisticated product.

Windows from our production program are combination of European experience and excellent local materials which results in high quality, duration, economy in heating premises and simple maintenance.

The windows are made in variants WOOD-WOOD (euro-falc and euro-nut) and WOOD-ALUMINUM as one wing, two-wings, many-wings, arch window, triangular, segmental...

All wooden parts are protected by double environment-friendly final coating from the production program of reputed European producers (ICA, SAYER-LACK).

Quality thermal and sound insulation is obtained by fitting with thermally insulated glass 4+16+4.

Standard delivery 4+16+4 mm-Float K-1,8 W

Special offers 4+16+4 mm- low emission argon filling K-1.1W

We provide UV protection and meet exterior demands by different type of colored glass and with foils (stopsol and parsol).

Window sealing is solved by quality sealing rubber bands with triple groove which allows the highest possible level of sealing.

Owing to above specified characteristics, the windows from our production range have superb thermal and sound insulation.

Permanent protection from atmospheric influences is provided with aluminum profiles by German producers GUTMAN- system MIRA with external moulding which prevents any influence of outside weather conditions (rain, snow, sunshine) and gives excellent thermal and sound insulation. This profile is joined with our wooden three-layer element, cross section: 72 x 86 (spruce, pine, oak) which ensures superb product in accordance with European norms. We manufacture windows and balcony doors in large range of colors in line with shades cart: in addition this window allows for combination of colors of exterior and interior profile

windows

wood-wood

The windows are manufactured from three-layer wooden and laminated profiles (spruce, pine, oak) in accordance with European DIN standards, which implies suitable level of wood humidity...waterproof glue and manufacturing quality. Our profiles are in-house produced which guarantees that quality requirements are met.

Profiles of such characteristics eliminate all kinds of bending irrespective of profile length and climatic conditions.
